Career summary so far

Results-driven MERN Stack Developer with 3+ years of hands-on experience architecting and delivering scalable, high-performance web and mobile applications. Highly proficient in React.js, Next.js, Node.js, and real-time technologies including WebSockets and Socket.io. Demonstrated ability to lead end-to-end development of production-grade platforms - spanning transportation booking systems, real-time prediction markets, blockchain-integrated interfaces, and enterprise supply chain solutions. Passionate about clean UI/UX design, component reusability, and modern frontend architecture that drives measurable business impact.

Education

Bachelor of Technology - Computer Science <i>S.P. Memorial Institute of Technology · Kaushambi, U.P.</i>	Uttar Pradesh <i>2023 - 2026</i>
Diploma in Computer Science Engineering <i>Government Polytechnic Aadampur Tarabganj Gonda</i>	Gonda, U.P <i>2019 - 2022</i>

Technical Skills

Programming Languages: HTML, CSS, JavaScript, C Programming
Frameworks: React.js, Next.js, React Native, Node.js, Express.js, MongoDB, MySQL.
Libraries: Redux, Redux-persist, yup and formik, Socket.io, Axios, MUI, ShadCn, Apex Charts, Apache E-Charts, React-table, Tailwind CSS, Ant.Design, Moment.js, etc
Developer Tools: Git, GitLab, Visual Studio Code
Spoken Languages: English, Hindi

Experience

MERN Stack Developer <i>Dunitech Soft Solutions Pvt. Ltd.</i>	July. 2025 - Present <i>Lucknow</i>
- Developed scalable and responsive web applications using React.js, Next.js, Node.js, Express.js, and MongoDB with a focus on reusable components, clean architecture, and performance optimization. - Integrated REST APIs, WebSockets, Redux, Redux Persist, and real-time data handling mechanisms to build interactive applications with seamless state management and live data synchronization. - Worked extensively with Google Maps API, blockchain wallet integration, smart contract APIs, authentication systems, and modern UI technologies including Tailwind CSS, Material UI, and responsive design principles.	
Frontend Developer <i>Omni Market Pvt. Ltd.</i>	May. 2024 - Jan. 2025 <i>Mumbai</i>
- Worked extensively with React.js, React Native, Redux, Redux Persist, and REST APIs to build scalable web and mobile applications with role-based functionalities and real-time data management. - Implemented dynamic dashboards, CMS modules, inventory systems, and shipment tracking features using JavaScript, Node.js, Express.js, MongoDB, and API-driven architectures. - Utilized modern development technologies including Google Maps API, WebSockets, Tailwind CSS, Material UI, Git, and responsive UI/UX practices to improve application scalability, performance, and operational workflows.	
Frontend Developer <i>Aara Groups Pvt. Ltd</i>	Mar. 2023 - Nov 2023 <i>Lucknow, U.P.</i>
- Utilized React.js, Node.js, Express.js, MongoDB, REST APIs, Socket.io, Tailwind CSS, and Material UI to build scalable, real-time, and performance-driven web applications. - Developed and maintained CRM, HRM, ERP admin dashboards, and the AMAKA Industries e-commerce platform with features including inventory management, order lifecycle tracking, and operational monitoring. - Implemented responsive UI architectures, live data synchronization, notification systems, and real-time communication workflows to enhance scalability, usability, and operational efficiency.	

Internships

Techpile Technology Pvt. Ltd.

MERN Stack Trainee Intern

Aug 2022 – Feb 2023

Lucknow, U.P.

- * Built strong foundational expertise in React.js, including JSX, component architecture, Hooks, state management, reusable UI development, and single-page application routing with React Router.
- * Worked with REST API integration using Axios and explored backend development fundamentals with Node.js, Express.js, and MongoDB for building MERN stack applications.
- * Gained practical exposure to real-time communication concepts using Socket.io alongside responsive front-end development with HTML, CSS, JavaScript, and modern React workflows.
- * Utilized Git and GitHub for version control, collaborative development, code management, and maintaining structured development practices across projects.

Projects

OpinionKings Platform | *Nest.js, Node.js, MsSql, Express.js*

Completed

- * Developed a scalable real-time prediction market platform using React.js, Next.js, Node.js, Nest.js, Redux Toolkit, and WebSockets with live trading, dynamic market updates, and real-time order execution capabilities.
- * Implemented secure authentication systems including Google Login, user wallet management, RESTful APIs, market data processing, and synchronized trading workflows for seamless user interaction.
- * Designed responsive, high-performance trading interfaces using Tailwind CSS with interactive market analytics, live price visualization, and optimized user experience across desktop and mobile platforms.

goQuicksilver – Global Transportation (User Booking Platform) | *React.js*

Completed

- * Developed a full-stack restaurant reservation and seat booking platform using React Native, React.js, Node.js, MongoDB, and WebSockets with live table availability and instant booking confirmation features.
- * Built customer-facing mobile applications and role-based admin panels for restaurant management, reservation handling, seating schedules, customer records, and operational workflow management.
- * Implemented analytics dashboards and real-time operational APIs to monitor booking activity, occupancy rates, and business performance with responsive and scalable UI architecture.

Colony App & Admin Panel | *React Native, React.js, Node.js, Express.js, postgres*

Completed

- * Developed a full-stack restaurant seat booking and reservation management system with live table availability tracking and instant booking confirmation via WebSockets.
- * Built the customer-facing React Native mobile app for discovering nearby restaurants, reserving tables, and managing personal booking history.
- * Delivered a comprehensive Admin Panel for managing restaurants, tables, seating schedules, reservations, and customer records with role-based access control.
- * Created an interactive analytics dashboard for monitoring occupancy rates, booking volumes, and operational KPIs to support data-driven management decisions.

SupplyMatch | *React.js, Socket.io, MUI, Shad cn, Scss, Axios, Redux*

Completed

- * Delivered a full-suite supply chain solution encompassing an Admin Console, Supplier Dashboard, marketing website.
- * Enabled real-time supplier-retailer communication via Socket.io, dramatically accelerating response times for order updates, stock alerts, and logistics coordination.
- * Implemented role-specific feature sets for suppliers, retailers, logistics operators, and sub-users with deep REST API integration for inventory, order processing, and shipment tracking.

Supplymatch App | *React Native, Axios, Redux, Redux Persist, Google Maps API, Third-party NPM Packages* **Completed**

- * Developed a cross-platform mobile application using React Native to streamline supply chain and logistics operations for suppliers, retailers, and delivery partners.
- * Implemented role-based authentication and dashboards with dedicated functionalities for suppliers, retailers, logistics teams, and sub-users to improve workflow management.

- * Integrated RESTful APIs using Axios for real-time inventory updates, order management, shipment tracking, and user activity synchronization across the platform.
- * Utilized Redux and Redux Persist for efficient global state management and persistent user sessions, improving application performance and user experience.
- * Integrated Google Maps features for live location tracking, route visualization, and delivery monitoring to enhance logistics transparency and operational efficiency.
- * Optimized UI/UX with reusable components and third-party NPM libraries, ensuring responsive design, smooth navigation, and seamless cross-platform compatibility.

ERP Management System | *React.js, SCSS, MUI, Apex Charts, Axios, Redux, Moment*

Completed

- * Built a modular Enterprise Resource Planning system encompassing Finance & Accounting, Inventory Management, Human Resources, and CRM functional areas.
- * Developed interactive dashboards with Apex Charts to deliver real-time reporting, performance analytics, and executive-level KPI visibility across business units.
